

## Coordinated Specialty Care Program

### Does this sound like you or someone you love?

- “Hearing or seeing things that other don’t.”
- “Having thoughts or beliefs that appear to you or others as strange”.
- “Withdrawing from family and friends”.
- “Feeling fearful or suspicious of others”.

If this does, it is important to know that *early intervention* is the key to a successful recovery.

Emergence Health Network offers a program called *Coordinated Specialty Care* that can help young folks who have recently began experiencing these thoughts, feelings or behaviors.

### What is Coordinated Specialty Care?

- Treatment program for adolescents and young adults who have recently been experiencing unusual thoughts and behaviors, or who have started hearing and seeing things that that others don’t.

### What does Coordinated Specialty Care offer?

- Clinical care (i.e. individual counseling, family interventions, safety interventions, etc.) and support for up to 2 years based on your needs and preferences
- Help finding a job, or returning to school, family education and support, and other services as needed
- Medication treatment, if you and your doctor decide it is needed

### Why early intervention?

- It is the key to a successful recovery.
- Treatment is most effective when it is started early.
- If left untreated, these thoughts, feelings or behaviors can increase over time.

### Who Can Participate?

You or your loved one may be eligible to participate if you:

- Are between the ages of 15 and 30 years old
- Have been experiencing unusual thoughts and behaviors, or hearing or seeing things that others don’t, within the last 2 years
- Are willing to be evaluated by a health professional
